# THE ANSWER TO SUSTAINABLE, AFFORDABLE, AND HEALTHY ORCHARD CLEAN-UP

**TURN THE PRUNINGS FROM YOUR ORCHARD INTO ENVIRONMENTALLY FRIENDLY MULCH!**

**5% discount for jobs  
booked and run  
by 1/17/2019.**

**AGRI SHRED**

**Agri-Shred** began when three hazelnut farm families (Brentano, Gaibler, and George families) recognized the need for sustainable solutions to their own aggressive orchard pruning. The answer was Agri-Shred, the Flory WS910 Brush Shredder first manufactured for the almond industry. This 440 hp, branch-shredding monster can handle heavy pruning loads, cover acreage quickly, and leaves no negative impact on orchard floors – especially in the rainy season.

Our families now offer the services of “Agri-Shred LLC” to the entire Oregon hazelnut industry. Hurry now to book and run Agri-Shred before January 17th, and you’ll get 5% off your shredding bill. Watch impressive videos of the Flory WS910 in action at [goflory.com](http://goflory.com) and click the “Videos” tab to view the “Self Propelled Brush Shredder.”

The Flory WS910 moves quickly on tracks, only applying 7 lbs. of pressure per sq. ft. to the orchard floor.

## BENEFITS TO GROWERS:

- Financial savings for both short and long term
- No tractor ruts on the orchard floor
- Runs efficiently in wet or dry conditions
- Growers avoid burning debris piles
- Return vital nutrients to the orchard soil
- Flory WS910 can cover up to 15 acres per hour
- Environmentally friendly and fast, with minimal impact

Growers are finding **Agri-Shred** to be **THE** answer to orchard clean up. Call to learn how **Agri-Shred** can help!
