GROWERS GUIDE

2025

SUMMER EDITION

FROM OREGON'S ORCHARDS TO THE WORLD

2025 A WORD FROM LARRY & SHAUN

Dear Friends & Fellow Hazelnut Growers,

The Oregon hazelnut industry was significantly impacted by big changes in 2024. However, even with nearly 30% of the industry's processors collapsing in the first half of 2024, the harvest and processing seasons were smooth and successful. This season has shown us that the Oregon hazelnut industry is strong and resilient, and there are clear reasons for continued optimism about the future of Oregon hazelnuts.

Processing and marketing hazelnuts is a complex business that requires precision planning and execution. George Packing Company (GPC) and Northwest Hazelnut Company (NWH), through long-term investments in the industry, have established lasting, stable, and economically sustainable supply chains, with the goal of maximizing returns back to growers. The continuation of a transparent, fixed-fee processing model is our commitment to continuing to invest in the future of the industry.

GPC and NWH have led the industry in promoting hazelnuts in both domestic and international markets, continuing to invest heavily in new markets, technology, and innovations. We have all seen how currency exchange rates, trade conflicts, inflation, logistical breakdowns, and other issues can dramatically affect the Oregon hazelnut market. However, our efforts to build strong market relationships have allowed GPC/NWH to effectively market and sell the nuts you deliver to us every year. Our rapidly increasing capacity and state-of-the-art facilities allowed us to process the harvest with record efficiencies and the highest quality, gaining Oregon hazelnut farmers millions in increased field prices. We are very excited about the many market opportunities that we are working on for the future of our industry.

In 2024, we added Hazelnut Growers of Oregon (HGO) to our team, acquiring their assets and facility. Although there were fundamental problems with the HGO plant, the depth of our team's expertise gave us the unique ability to solve these problems. We took possession on September 1st, and by October 15th, the plant was already an important part of processing the 2024 crop. We expect full modification and conversion to be completed by mid-summer 2025, and the HGO plant will fully realize its potential for the Oregon hazelnut industry this upcoming harvest!

The hazelnut market has rebuilt from the lows of 2022 — and this year, we realized a profit share of more than \$40 million for just the GPC/NWH/HGO growers!! This rapid normalization of field pricing gives us great optimism for the upcoming seasons. With your partnership, we can continue to maintain the highest quality products and most transparent supply chain in the world.

This Grower's Guide presents useful tips and resources in an easily accessible place to help you prepare for this year's harvest. As always, thank you for your continued business!

Warmest regards,

Larry George

OREGON'S GROWTH HAZELNUT PRODUCTION

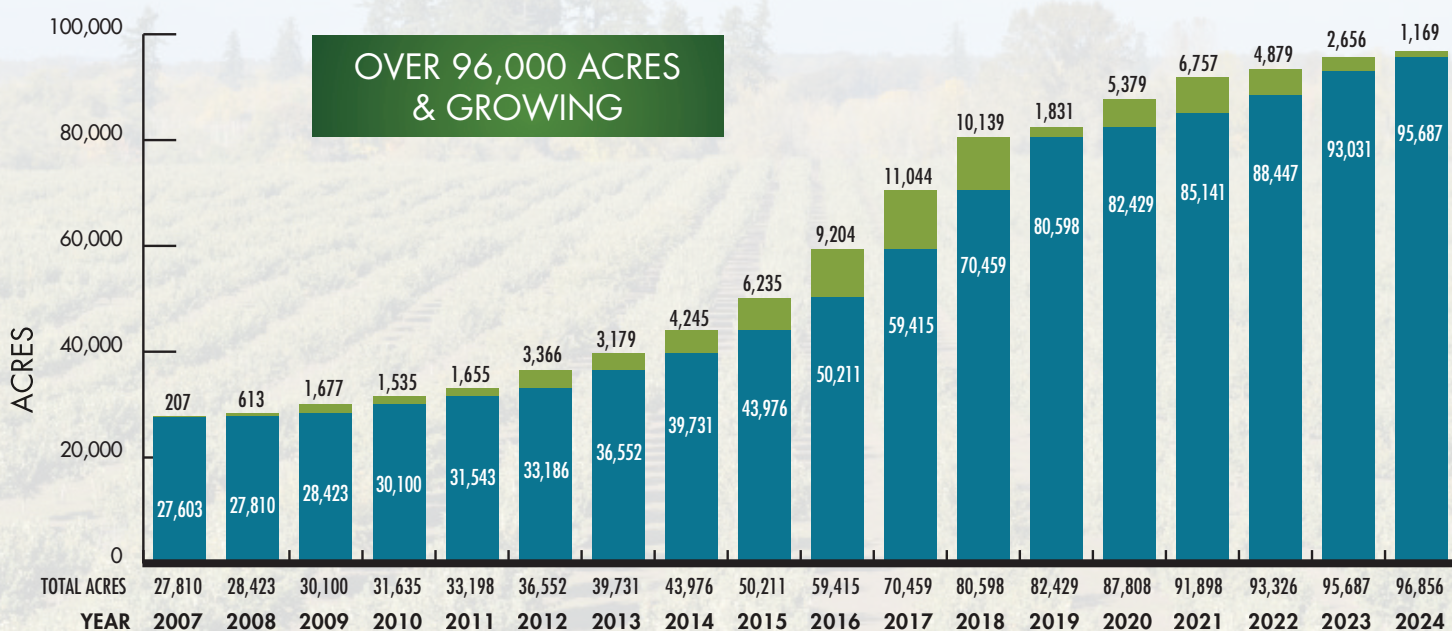

Our industry has experienced 17 years of rapid growth and expansion, with the total acreage nearly tripling in size. Fully mature and producing acreage currently stands between 50,000-70,000 acres, while about 64,000 new acres have been planted since 2008. Total acreage for the hazelnut industry now stands at approximately 96,000 acres, while new orchards are still being planted at a slower rate. Some farmers are transitioning from crops like cane berries and grass seed to hazelnuts as the popularity of hazelnuts grows. Older hazelnut orchards susceptible to the Eastern Filbert Blight are being removed at a rate of around 500-1,000 acres per year.

INTERESTING FACT

The Willamette Valley only produces 5-6% of the world's hazelnuts, but 99% of the United States' hazelnut harvest.

New & Established Acreage from 2007 to 2024

Established Acres New Acres

HAZELNUT PRODUCTION WORLD MARKETS

Oregon is proudly playing a significant role in the global hazelnut industry. While making up about 99% of the U.S. hazelnut harvest, Oregon contributes an impressive 5-6% to the world's total production. With Turkey leading at nearly 2/3 production, Oregon has established itself as one of the top three hazelnut-producing regions in the world, showcasing the quality and flavor of our local hazelnuts.

INTERESTING FACT

The 2024 California almond crop was estimated to be 2.8 billion "kernel meat" pounds, making Oregon's record 2024 hazelnut crop roughly 3% of the California almond crop in kernel weight.

YEARLY GROWING CALENDAR

A lot of work goes into raising prized Oregon hazelnuts—or filberts, as we often call them. Hazelnuts thrive in the mild climate of the Willamette Valley. Follow this annual growing calendar to maintain a healthy orchard.

OREGON HAZELNUT VARIETIES

The Oregon State University (OSU) traditional hazelnut breeding effort dates to the 1960s, developed by visionary growers looking to the future. OSU leads the team of breeders and extension scientists who develop new, highly productive, disease-resistant varieties. This guide illustrates the main varieties traditionally grown and currently being planted in the Willamette Valley.

TRADITIONAL VARIETIES (WITHOUT GASAWAY GENE)

	NAME ESTABLISHED DATE	ESTIMATED KERNEL YIELD %	BLANCHING* SCORE	PERCENT DOWN**	RECOMMENDED POLLINIZERS + (ADDITIONAL)	NUT WT. (GRAMS)	GOOD NUT %
	Barcelona EST 1895	39-43	4.5/5.0	95% BY OCT 14	Gamma, York, McDonald	3.3-3.8	70-85
	Casina EST pre-1980	50-53	6.0	95% BY OCT 8	Felix, York	1.4-2.2	78-89
	Clark EST 1999	48-51	2.6-3.5	95% BY OCT 8	Felix, York	2.5-2.8	69-81
	Ennis EST 1980	43-46	6-7	95% BY OCT 14	J5, Casina, Felix, York	3.1-4.6	64-92
	Lewis EST 1997	46-48	4-5	95% BY OCT 7	Wepster, York, Felix (Tonda di Giffoni, Hall's Giant)	2.7-2.9	83-90
	Sacajawea EST 2006	48-50	2.5-3.5	95% BY SEP 26	McDonald, York (Lewis)	2.8	84

*Blanching Scale = 1 (99%) to 7 (0%) pellicle removal

**Nut drop is also affected by crop load, drought stress, EFB infection stress, weather, and age of the trees.

HOW TO CHOOSE NEW PLANTINGS

Before planting a new orchard, one should give serious consideration to varieties, orchard design, orchard site (soil and slope suitability), pre-plant soil management, and other factors. Some varieties are much more sensitive to Eastern Filbert Blight (EFB). See the chart below for a relative spectrum of EFB susceptibility. With new plantings, one should consider mixing in a number of pollen-compatible varieties, with suggestions at the present time leaning toward the new EFB-resistant gene pollinizer varieties released by OSU's Hazelnut Breeding Program, which are Eta, Felix, Gamma, Theta, and York. Here is a list of new varieties with the Gasaway resistance gene and their recommended pollinizers.

NEW VARIETIES AND THEIR RECOMMENDED POLLINIZERS:

Jefferson = 40%Theta, 40%Eta, 20%Felix
Dorris = York, Yamhill, McDonald
Yamhill = York, Dorris, McDonald, Wepster
Wepster = McDonald, York, Felix
McDonald = Wepster, York, Felix
Sacajawea = McDonald, York, Felix
PollyO = McDonald, Wepster, York

RELATIVE SPECTRUM OF EFB SUSCEPTIBILITY

Highly Susceptible	Susceptible	Less Susceptible	Some Resistance	Gasaway Resistance
Ennis Daviana Casina Piedmont	Barcelona Butler Hall's Giant Willamette	Lewis Clark Gem	Sacajawea Tonda di Giffoni	Yamhill Jefferson Dorris Wepster McDonald Theta Eta Felix York Gamma PollyO

INVEST IN HAZELNUT AGRONOMY RESEARCH

OSU ENDOWMENT

For nearly two generations, Oregon hazelnut growers have been focused on developing hazelnut varieties that are resistant to the Eastern Filbert Blight. For simple survival, our industry has invested heavily in the Oregon State University (OSU) Hazelnut Breeding Program and even created an "endowment" to permanently fund the breeding research position.

Now, with over 90,000 acres planted, farmers up and down the state are asking more questions about increasing yield and improving quality through agronomy. Such research will increase per acre production and therefore higher per acre returns for growers. With market pressures like we have seen over the past few years, future profitability will rest on expanding "per acre" yields and reducing defects such as mold, insect damage, and shrivel.

Many experts believe that, with additional research in agronomy, we can increase gross returns per acre by 15-25%. The addition of Dr. Nik Wiman in 2012 as OSU's Orchard Crops Extension Professor has been a huge benefit for our industry.

Dr. Wiman earned a BS (biology) and MS (entomology) from Montana State University, where he worked on biological control of weeds in rangeland. From there, he transitioned into tree fruit entomology, working for nearly a decade on mating disruption, biological control, and pest population dynamics in Wenatchee, Washington. He ultimately earned his PhD (entomology) from Washington State University in 2011.

On October 13, 2022, George Packing Company was a signer of an Endowed Fund Gift Agreement with the Oregon State University Foundation to create the **"Hazelnut Chair at The North Willamette Research & Extension Center."** The objective is for the hazelnut industry to raise \$2 million over the next 8 years to create a permanent and stable funding source for hazelnut agronomy research.

Currently, Dr. Wiman's position is subject to state legislative funding, OSU budget allocations, and independent fundraising – none of which lend themselves to the long-term planning we need for a permanent crop like hazelnuts. This endowment will give long-term funding stability to Dr. Wiman and his team's hazelnut agronomy research. Please remember to support Dr. Wiman's efforts with an investment from your farm into the endowment – Dr. Wiman's research is adding more money to everyone's pocket!

HAZELNUT CLEANING & DRYING PROCESS

Farm families in the GPC and NWH processing network invest millions expanding cleaning and drying capacity for your crops. We keep cleaning and drying costs low while maintaining the highest quality hazelnuts for world markets. Learn more at Filberts.com/grower-resources.

HARVEST EARLY, OFTEN & DRY!!!

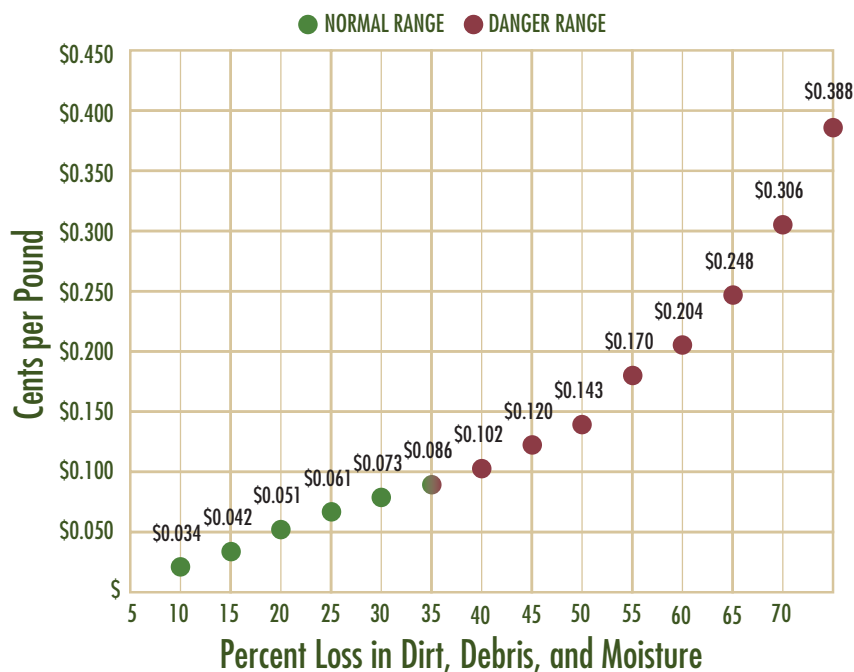

HARVESTING CLEAN & DRY MEANS HIGHER RETURNS

As a hazelnut grower, you know harvesting in dry weather maintains quality and saves on grower dockage. But did you know it can make you big money? **Look closely at cleaning and drying costs — you'll see \$0.05-\$0.10 or more of your field price chiseled away by bringing in wet and dirty hazelnuts.**

Most hazelnut processors subsidize the cost of cleaning and drying. However, **the more dirt, debris, and moisture (DD&M) the grower brings in, the more the grower pays of the cleaning and drying costs.** The Hazelnut Growers Bargaining Association designed its sliding scale to reward growers who maintain their hazelnuts and deliver the high quality that Oregon markets demand.

A grower with 10% DD&M pays just a little over \$0.03/lb., while growers with 40% DD&M pay over \$0.10/lb. — that's 3x as much! **By harvesting early, you not only save money, but you help boost Oregon hazelnuts' reputation as the highest quality in the world.**

COST PER POUND FOR CLEANING & DRYING

GEORGE PACKING COMPANY PARTNER RECEIVING STATIONS

Delivering your crop to George Packing Company has never been easier! We have 29 conveniently located receiving stations in the Pacific Northwest – from Lane County, Oregon, up to Chilliwack, British Columbia. Please look over the map below to find the station nearest you. We are grateful to the companies and families who run these stations for their partnership with George Packing Company, Northwest Hazelnut Company, and Hazelnut Growers of Oregon.

With 30 years of constant investment into the latest processing technologies, our growers have consistently realized the highest returns in the industry for their harvest. Please consider delivering your 2025 crop to one of our convenient and friendly receiving stations.

HAZELNUT INDUSTRY ORGANIZATIONS

The idea for an industry office to house different entities with overarching goals goes back to 1949. Oregon's hazelnut industry organizations evolved to meet the industry's needs and avoid duplication of efforts. These four organizations named below share one industry office and staff. Each is responsible for different projects, and each is funded by grower, processor, or vendor dollars.

ORGANIZATION	MAKE-UP	FUNDED BY	RESPONSIBILITIES
Hazelnut Marketing Board (HMB)	• 5 Growers (geographic rep) • 4 Handlers • 1 Public Member • Voted on by growers & handlers & appointed by the US Secretary of Agriculture	Handlers are assessed \$10 per ton of merchantable product handled.	• Administer Federal Marketing Order 982 • Administer quality & volume regulations • Oversee promotion program • Provide industry production & use statistics
Oregon Hazelnut Commission (OHC)	• 6 Growers (geographic rep) • 1 Handler • 1 Public Member • Recommended by NGS & appointed by the Oregon Director of Agriculture	Growers are assessed \$17 per ton of merchantable product sold to handler. Handlers collect funds & send to OHC.	• Administer Oregon State Commodity Commission Act • Administer production research with OSU & private entities • Work with OSU Extension • Responsible for commodity commission legislation • Responsible for working with EPA to obtain special use chemicals
Nut Growers Society (NGS) OF OREGON, WASHINGTON & BRITISH COLUMBIA	• 5 Growers (geographic rep) • 1 OSU Extension • Growers nominated & voted on by growers	Dues (\$100 annually). Sponsorships.	• Disseminate industry information from other organizations via the newsletter & proceedings of the annual meeting • Hold Annual Winter Meeting • Hold Summer Tour
Associated Oregon Hazelnut Industries (AOHI)	• 3 OHC Officers • 3 Largest Handlers • NGS President • Person familiar with current issue • AOHI is pursuing	Contracts with NGS to do Summer & Winter Trade Shows.	• Federal & state legislative matters • Other industry issues as needed

The Nut Growers Society sponsors two meetings each year where hazelnut growers can attend workshops, tour orchards, visit with packers, and peruse trade booths for hazelnut farming-related industries and equipment manufacturers. The Annual Meeting takes place every January and the Summer Tour every August at rotating locations.

HAZELNUT INDUSTRY GROWER ADVOCACY

The Hazelnut Growers Bargaining Association (HGBA) is a farmers' cooperative established in 1972. The grower-member association was created to provide growers and processors transparency and stability in the buying and selling of hazelnuts.

300+
Active
Members

85%
Amount of today's total
crop represented

WHY JOIN THE HGBA?

By providing one of the country's most transparent and pro-farmer contracts, the HGBA is the envy of other commodity groups. We have a strong industry because of our open dialogue, cooperation, and trust established between growers and processors.

GROWER ADVOCACY

The HGBA contract is unique to our industry. As a pro-grower contract, it sets a grower advance starting price in the fall, which member cash processors must pay growers regardless of market fluctuations. Because of this contract, Oregon farmers can count on a specific price, giving them all the upside over the entire market year, without the downside risk.

PROCESSOR SUPPORT

The contract supports its processors by clearly defining rules for grading, dockage, cleaning and drying, transportation, and payment terms while requiring packers to treat all their growers the same.

BENEFITS OF HGBA MEMBERSHIP

- Supports grower involvement and uniform pricing
- Sets payment terms within 45 days of final delivery
- Negotiates early guaranteed minimum price
- Transparent market intelligence
- Active membership that advocates for growers
- Multiple packer support

SUPPORT LOCAL HAZELNUT BUSINESSES

We're showcasing eight local hazelnut companies that are developing and promoting exciting new products using Oregon hazelnuts. Alongside their diverse retail offerings, they provide an array of incredible selections for purchase. Don't miss the chance to support the businesses that uplift our industry! Explore their websites and place your orders today!

PACIFIC HAZELNUT CANDY FACTORY

14673 Ottaway Rd NE, Aurora, OR 97002
503.678.2755 | pacifichazelnut@gmail.com
PacificHazelnuts.com

Andrew acquired Pacific Hazelnut Candy Factory in the historic village of Aurora, Oregon, back in 2010 and has grown it into what *Oregon Family Farmer* now calls "a must-see destination in Oregon." Pacific Hazelnut has been helping to grow the retail hazelnut market by continuing to expose it to many new retailers, Oregon stores, and new markets in co-manufacturing. The factory has a "one-stop gift shop" offering tasty treats made right on the premises, in addition to pre-made gift boxes and customized gift baskets. Be sure to stop by the factory or order online to get your hazelnut treats, seasoned or chocolate covered!

KING FRESH

4386 Desart Rd, Silverton, OR 97381
503.873.3287 | kingfresh@kingfreshllc.com
KingFreshllc.com

King Fresh began as a produce business, branching out into hazelnuts in the fall of 2007 when they planted their first orchard. Since then, this mother-daughter team began processing and packaging hazelnuts, eventually outgrowing the family kitchen as they developed the unique flavors they proudly sell today.

You'll find King Fresh products gracing the shelves at many fine specialty markets including Market of Choice, Roth's Fresh Markets, and World Foods.

PREMIUM GROWERS

8633 Wabash Dr NE, Salem, OR 97305
503.592.7176
PremiumGrowers.com

Three friends who grew up in the same rural community in Oregon now manage Premium Growers. With great pride, the three friends not only grow the nuts—they transform them into tasty and healthy snacks. They came together to bring a new version of a very old, healthy snack to the world through experimenting with roasting.

Many of you know Premium Growers from their dominant sales position at www.Amazon.com, but you can buy great gifts directly on their website at www.PremiumGrowers.com.

KEN & JUNE'S HAZELNUTS

8046 McKay Rd NE, St. Paul, OR 97137
503.633.2191 | info@kjhazelnuts.com
KJHazelnuts.com

For over 20 years, Ken & June's Hazelnuts, Melcher Family Farm has been crafting innovative hazelnut products for grocery and specialty stores across the Pacific Northwest. With over 60 years of family farming tradition, the third generation has transformed this small business into a respected regional brand, showcasing Oregon hazelnuts throughout the Northwest.

Shop online at www.kjhazelnuts.com, visit their farm store near St. Paul, Oregon, or find their products at New Seasons Markets, Market of Choice, and Roth's Fresh Market.

HAZELNUT HILL

PO Box 134, Junction City, OR 97448
541.510.4464
HazelnutHill.com

One of the few tree-to-table producers of hazelnut products in the U.S., Hazelnut Hill is a family-owned business located just north of Eugene, Oregon. They source their hazelnuts from the family's 400-acre farm and roast and make all products on-site to ensure the freshest, high-quality nut-based products. Their product lineup includes chocolate covered hazelnuts, nut butter, pancake mix, brittle and more.

Find their products online at www.HazelnutHill.com and specialty shops throughout the region.

BAIRD FAMILY ORCHARDS

BairdFamilyOrchards.com

The Baird Family Orchards grow many varieties of apples, peaches, cherries, nectarines, pluots—and yes, hazelnuts—on their farms in Dayton, Oregon, and Maryhill, Washington.

What once started as a small apple growing operation in 1979 has expanded to the family offering their delicious varieties of fruits, nuts, and jams at more than 15 farmers markets in Oregon.

Nutlicious™ **HAZELNUT BLISS**

Savor the nut butter and spreads with the ultimate hazelnut lover in mind. Our satiny-smooth and creamy hazelnut butter and spreads are masterfully crafted and bursting with flavor to indulge your senses and make everyday creations irresistible!
